

MBA IN ENERGY MANAGEMENT

JPT/BPP(R/345/7/0391)07/23
JPT/BPP(N-DL/345/7/1103)09/24

Getting smart about Energy Management

Rising energy demand is at odds with the threat of fast depleting energy resources—demanding energy providers to engage a strategic approach to energy management. Amid intensifying scrutiny over costs, carbon output and sustainability, the oil, gas and energy industry requires a resourceful talent pool of energy management professionals to navigate global challenges in support of United Nation's Sustainable Development Goals.

In response to the global forces at work, Master of Business Administration in Energy Management (MBA-EM) prepares students to pivot to new technologies and drive towards a model that supports future-looking strategies. As such, the programme exposes students to a wide array of real industry challenges and case studies. In addition to lectures, the programme offers multi-sided learning approaches such as seminars and consultancy based projects. Ultimately, by leveraging the latest energy management knowledge and trends, students are poised to play a critical role in the design of the industry's carbon-neutral future.

Programme highlights

Driving demonstrable intelligent energy management solutions

Programme supports Malaysia's Carbon-Neutral 2030 blueprint.

Programme is now available in Open Distance Learning (ODL) mode at UTP's regional Centre for Advanced and Professional Education (CAPE), Kuala Lumpur

Fresh graduates are highly encouraged to take advantage of the industry's disruptive opportunities.

Join the industry's highly sought after talent pipeline of energy management specialists! Benefit from learning objectives tied to the contours of reality-based industry situations and changes.

Join a leading feeder university for the energy industry!

Get in touch with the latest industry thinking.

Grow your industry perspective with subjects grounded in day-to-day industry challenges, opportunities and outcomes.

Learn how to leverage real industry data and research evidence to provide solutions through cutting edge technology tools and management techniques.

Signing up for UTP MBA-EM 2014-2015 was easily one of the best decisions I've made in life. It is a well-designed programme delivered by established academics. UTP's reputation and strong industrial collaboration set the programme apart from others. The icing on the cake has to be the programme's energy management modules. Delivered by UTP's international partners, this opened many doors for me, both professionally and academically towards bigger professional exposure and exciting academic opportunities. Thank you UTP for Unlocking my True Potential!

- Shamsul Bahri -

Head, Risk Management, Malaysia Petroleum Management, PETRONAS

Who is the programme for?

The programme is designed for the energy sector's corporate talents, technical managers, engineers, regulators, and professionals with an eye towards enhancing their business managerial capability.

4 reasons to join MBA in Energy Management at UTP

- 1** Modular-based programme jointly developed with PETRONAS' custodian engineers and reputable energy management companies
Reap the benefits of an industry-backed programme that supports the global mission of the industry.
- 2** Leverage our vast industry network
Grow your industry perspective with subjects grounded in day-to-day industry challenges, opportunities and outcomes. Network with forward-thinking peers and turn industry feedback into impactful action.
- 3** Get a sneak peek at the future with maximum industry exposure
Boost your industry readiness and take advantage of a diverse range of career opportunities.
- 4** Go virtual with our Open and Distance Learning (ODL) programme
Offered with the flexibility of classes on campus, online or a blend of both, working professionals can opt for the best mode of learning to accommodate their busy schedules. Plus, stay in touch with our lecturers and industry experts via frequent meetings and consulting sessions at UTP's regional Centre for Advanced and Professional Education (CAPE), Kuala Lumpur.

The industry is our classroom

1	Programme subjects delivered by academics and industry experts
2	Industry-based projects and assignments: Capture real industry-derived analytical data resources.

“

UTP's MBA EM programme provides working professionals with improved design thinking capability, knowledge and the latest project management tools. In light of current global energy landscape, this course is especially useful for engineers who would like to advance their managerial career and gather a complete understanding of how the energy business works. Also, this course provides ample avenues for networking, debates and open discussions aided by the collective experience of our resourceful lecturers. The programme's Energy Management course is a winner, giving us the opportunity to interact with invited speakers whose vast knowledge in the energy management sector helped us get up to speed with global changes underway impacting the industry.

”
